DOI 10.1140/epjc/s10052-016-3910-6

In the original paper, Fig. 4 contains the wrong label preliminary. The label has been fixed, while none of the results have changed.

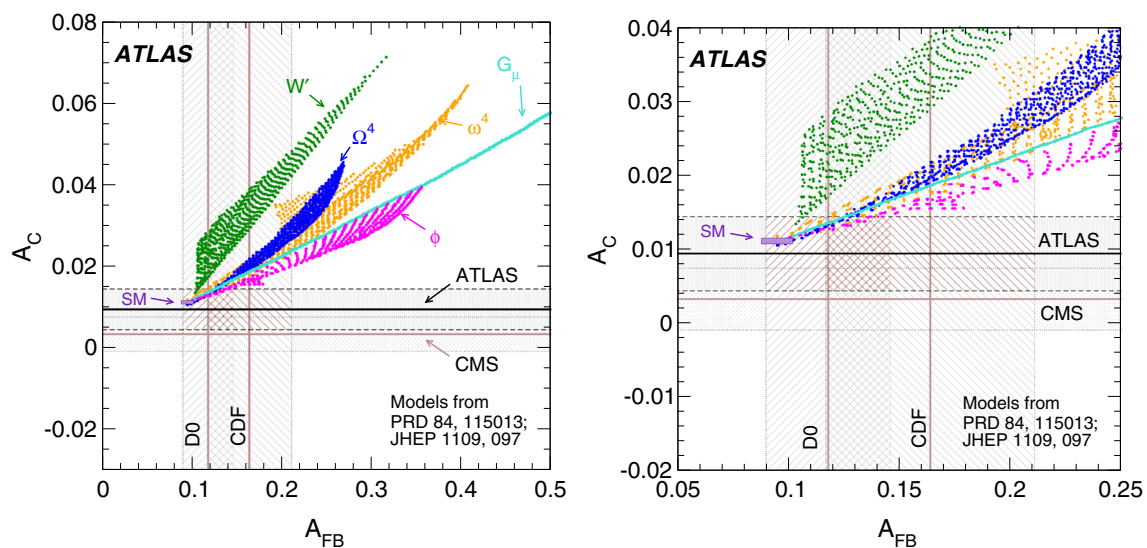

Fig. 4 Measured inclusive charge asymmetries A_C at the LHC versus forward-backward asymmetries A_{FB} at Tevatron, compared with the SM predictions [1, 2] as well as predictions incorporating various potential BSM contributions [3, 4]: a W' boson, a heavy axigluon (G_μ), a scalar isodoublet (ϕ), a colour-triplet scalar (ω^4), and a colour-sextet

scalar (Ω^4). The horizontal bands and lines correspond to the ATLAS and CMS measurements, while the vertical ones correspond to the CDF and D0 measurements. The uncertainty bands correspond to a 68% confidence level interval. The figure on the right is a zoomed-in version of the figure on the left
